Experience

VitalEngine (Birmingham, AL) — *UX Designer & Frontend Developer* January 2026 - Present

- Refreshed and refined seven major user interfaces for a HIPAA-compliant platform providing health practitioners a way to safely share patient charts & DICOM images and enable multi-hospital discussions on patient care.
- Designed and prototyped 7 product features end-to-end (VTask, VDrive, VCalendar, VMail, VitalRounds, VFax, and additional UI redesigns) by researching competitor platforms, sketching concepts, and building high-fidelity prototypes.
- Shipped VTask to production by owning the full lifecycle from initial wireframes through front-end implementation, API integration with backend engineers, QA handoff, and final stakeholder approval, preserving UX intent at every phase.
- Used **Claude Design** for high-fidelity prototyping and **Claude Code** for production ready React implementation. Removed the need for full Figma mockups each time and significantly cut turnaround between design and development.
- Led a design system overhaul with the team — audited the existing color palette, picked new primary and secondary colors for accessibility and coherence, redesigned older pages, and fixed UI/UX inconsistencies across the platform.
- Presented design rationale, user flows, and interaction patterns to the founder, engineers, and QA throughout each project to gather iterative feedback and ran usability tests to refine workflows and experiences.
- Contributed directly to the codebase. Opened 21+ pull requests, resolved merge conflicts, addressed code review comments, and refactored components to align with the **Lucide library** and project structure using **Git, GitHub, and lazygit**.
- Cleaned up and delivered production-ready POC code and UX documentation for VDrive and VCalendar to the development team, ensuring clean component structure for seamless implementation

Vietnamese Student Association, UAB — *Creative Director & Designer* June 2022 – February 2025

- Led visual design, brand identity, and creative direction for Lotus Under the Lights, UAB's largest annual cultural show, across two consecutive years.
- Designed **20+ social media assets** and merchandise for a 2,000-follower audience using Adobe Photoshop, Illustrator, and Lightroom, driving a 3**2% increase in merchandise sales**.
- Co-directed the creative production of an event trailer — shaping narrative, visual pacing, and brand storytelling to boost online engagement across platforms.
- Launched the organization's **first merchandise design competition**, generating 15+ community submissions and increasing pre-event Instagram engagement by **40%**.
- Directed an 8-person team to conceptualize, prototype, and install **10+ immersive environmental setups** for a 300+ attendee event — managing scope, creative iteration, and production timeline.

Projects

Nexo Calendar/Planning Website January 2025 - May 2025

- Designed and developed a React calendar app with real-time task syncing and Firebase backend, delivering a working MVP within 4 weeks as part of a 5-person team.
- Created wireframes and iterated on layouts and color systems in Figma; incorporated feasibility feedback from developers before building responsive pages and interactive components in React, HTML, CSS, and JavaScript.

Mixify January 2025 - May 2025

- Designed and built a Spotify API-powered playlist generator with Vue.js, enabling users to discover music across 1,000+ songs through curated, genre-diverse playlists.
- Developed a bold visual identity with rounded UI components and **animated CSS background** using keyframes and Gaussian blur — focused on playful, intuitive interaction design.

Education

University of Alabama at Birmingham August 2021 – May 2025
Bachelor of Arts (B.A.) in Computer Science

Relevant Coursework: Web Development, Graphic Design, Object-Oriented Programming, Game Development, Software Engineering, Comp Organization/Assembly (x86-64), Systems Programming

Skills

- **Design & UX:** *Figma, wireframing, low/mid/high-fidelity prototyping, user flows, design systems, usability testing, responsive design, accessibility*
- **AI-Enhanced Design**: *Claude Design, Claude Code, Cursor*
- **Front-End:** *HTML, CSS, JavaScript, React, Vue.js*
- **Design Tools:** *Adobe Photoshop, Illustrator, InDesign, Lightroom*
- **Collaboration:** *GitHub, Jira, cross-functional teamwork, design handoff*
